Quality Water Analysis 6571 Wilson Mills Rd Cleveland, Ohio 44143

1-800-458-3330

Sample Number:

812864

Location:

Quarry

Type of Water:

Collection Date and Time:

6/7/2010 20:30 6/8/2010 08:50

Received Date and Time: Date Completed:

6/14/2010

Definition and Legend

This informational water quality report compares the actual test result to national standards as defined in the EPA's Primary and Secondary Drinking Water Regulations.

Primary Standards:

Are expressed as the maximum contaminant level (MCL) which is the highest level of contaminant that

is allowed in drinking water. MCLs are enforceable standards.

Secondary standards: Are non-enforceable guidelines regulating contaminants that may cause cosmetic effects (such as skin

or tooth discoloration) or aesthetic effects (such as taste, odor,or color) in drinking water. Individual

states may choose to adopt them as enforceable standards.

Action levels:

Are defined in treatment techniques which are required processes intended to reduce the level of a

contaminant in drinking water.

mg/L (ppm):

Unless otherwise indicated, results and standards are expressed as an amount in milligrams per liter or

parts per million.

Minimum Detection

The lowest level that the laboratory can detect a contaminant.

Level (MDL):

The contaminant was not detected above the minimum detection level.

ND: NA:

The contaminant was not analyzed.

The contaminant was not detected in the sample above the minimum detection level.

The contaminant was detected at or above the minimum detection level, but not above the referenced standard.

The contaminant was detected above the standard, which is not an EPA enforceable MCL.

The contaminant was detected above the EPA enforceable MCL.

These results may be invalid.
